## Carestream Leverages Intel® Optane™ Technology in Medical Imaging

Carestream is a leader in developing and deploying medical imaging technologies for healthcare providers. They provide medical and healthcare IT solutions and X-ray film and digital X-ray products for the non-destructive testing market worldwide. Clinicians and referring physicians need the freedom to access patient data quickly and efficiently. With 2nd generation Intel Xeon Scalable processors and Intel Optane technology, Carestream can deliver a powerful combination of technologies that can scale more work with less total cost, providing imaging centers, hospitals and doctors' offices a model so that a patient's medical record can be affordable and accessible from everywhere.

“The mission of Carestream is to deliver the healthcare on a worldwide scale so the patient has the capability to have it accessible and on hand and on the other hand to have it fast. Intel® Optane™ data center SSDs are proving that the database performance of the system to deliver 2 -3 times faster than what it used to be in the past”<sup>1</sup>
