

“With 2nd generation Intel® Xeon® Scalable processors, we are able to offer our customer a high-performance private cloud solution at a great price/performance ratio.”

Sascha Prütz, CTO, myLoc

Cost-Effective Private Cloud Services on Intel® Technology

myLoc has two decades of experience with colocation and hosting. Recently, the company launched its VIP - Private Cloud Solution, powered by 2nd generation Intel® Xeon® Scalable processors. This hyperconverged solution provides myLoc’s customers with the data control they need and the security and performance they want—all at a cost that is up to 39% lower than a similar infrastructure hosted by a leading hyperscale service provider¹. Running on highly reliable HPE DL360 ProLiant Gen10 servers, the VIP – Private Cloud Solution is a great match for myLoc customers seeking a cost-efficient solution to host their own cloud in a security-enabled data center, while maintaining more control over their data.
